

HEMANTH KUMAR KOLLURU

M365 & IDENTITY ADMINISTRATION | ACTIVE DIRECTORY | AZURE | CLOUD SUPPORT

India • 9381971466 • kolluruhemanth99@gmail.com

PROFESSIONAL SUMMARY

Entry-level M365 & Identity Administration / Cloud Support professional with hands-on lab experience across Microsoft 365, Exchange Online, Active Directory, identity and authentication, Azure infrastructure, networking fundamentals, and technical troubleshooting. Strong understanding of AD DS architecture, DNS, Kerberos authentication, Group Policy, user/group management, mailbox administration, permissions, and access management. Additional exposure to AWS, SQL, PL/SQL, Snowflake, and Java, supported by practical projects in identity, cloud infrastructure, authentication, and data warehousing.

CORE TECHNICAL SKILLS

Microsoft 365 & Exchange Online Identity & Active Directory Kerberos & Authentication

M365 administration • Exchange Online • user/account management • mailbox management • shared mailboxes • distribution groups • M365 groups • Send As / Send on Behalf • permissions • mail-flow fundamentals • email troubleshooting

AD DS • forests, trees & domains • OUs • Domain Controllers • Global Catalog • FSMO roles • Sites & Services • replication • Group Policy • user/computer accounts • security groups • DNS • identity & access management

KDC • AS-REQ / AS-REP • TGT • TGS-REQ / TGS-REP • service tickets • authentication workflow • password hashing concepts • NTDS.DIT fundamentals • domain login and service authentication

Azure & Cloud AWS Data & Programming Support & Operations

Azure VMs • VM sizing • Resource Groups • VNETs • storage fundamentals • subscription management • cost awareness • Azure identity • administration • monitoring • security • Azure Virtual Desktop

AWS fundamentals • IAM concepts • EC2 • cloud service understanding • basic cloud architecture

SQL • CRUD • joins • subqueries • aggregates • views • constraints • query optimization basics • PL/SQL procedures/functions/packages/cursors/exception handling • Snowflake warehouses/databases/schemas/tables/data loading • Core Java • OOP • collections

Incident analysis • root-cause analysis • ticket resolution • user support • technical troubleshooting • access management • authentication issues • mailbox/email issues • cloud support

HANDS-ON PROJECTS

01 Active Directory Identity & Domain Lab | Windows Server • AD DS • DNS • Group Policy

- Configured an AD DS domain environment and practiced forests, trees, domains, OUs, Domain Controllers, Global Catalog, FSMO roles, Sites & Services, and replication concepts.
- Created and managed user/computer accounts and security groups; applied basic Group Policy controls and studied DNS dependencies for domain services.

02 Kerberos Authentication Workflow Lab | Active Directory • Kerberos • DNS

- Mapped the end-to-end domain authentication sequence: AS-REQ → AS-REP → TGT → TGS-REQ → TGS-REP → service ticket.
- Studied KDC operation, password-hashing concepts, NTDS.DIT fundamentals, ticket-based authentication, and the relationship between client, Domain Controller, and services.

03 Azure Virtual Machine Deployment | Microsoft Azure • VM • VNet • Resource Groups

- Deployed and configured Azure Virtual Machines; practiced VM sizing, Resource Group management, basic networking/VNet configuration, storage, subscription concepts, monitoring, security, and cost awareness.

04 Snowflake Data Warehouse Lab | Snowflake • SQL • Data Warehousing

- Created databases, schemas, tables, and virtual warehouses; practiced data loading and SQL querying for cloud-based analytical workloads.
- Applied joins, filtering, aggregation, data retrieval, and basic transformation concepts while learning Snowflake warehouse and compute fundamentals.

PROFESSIONAL TRAINING

HCLTech TechBee — IT / Cloud / Infrastructure Training

- Microsoft 365 Administration, Identity & Access Management, Active Directory and Windows Server.
- Azure fundamentals and administration, cloud infrastructure, SQL/database fundamentals, Snowflake data warehousing, and technical troubleshooting.

EDUCATION

Intermediate (12th Grade) — Aditya Junior College, Visakhapatnam | 90%

10th Grade — ZPVP High School | 493 Marks

CERTIFICATIONS & LEARNING PATH

Planned / In Progress: Microsoft Azure Fundamentals (AZ-900) • Microsoft Identity and Access Administrator (SC-300) • AWS Certified Cloud Practitioner • Snowflake certification pathway
